

Fodable option

Description:

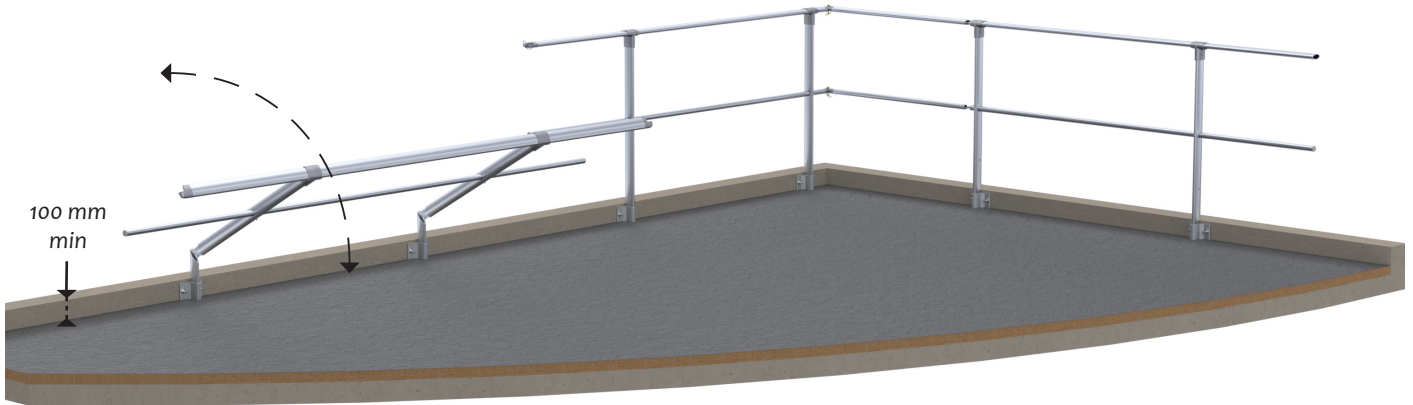

The **SECURILISSE®** is a collective system against falls from heights, designed for roofs that are inaccessible to the public. The foldable option is chosen for aesthetic reasons as the guardrail is **completely invisible from the ground when folded down**. This option is available for the GC-DP, GC-DA, GC-DAD and GCRE fixation.
There is a specific version of the foldable **SECURILISSE® autoportant rabattable** (see freestanding guardrail product sheet).

Details:

Material: Aluminium

Finish : Raw, anodised or powder-coated

Setup : Delivered with manuals and drawings available online at: <http://extranet.somain.fr>

Operation

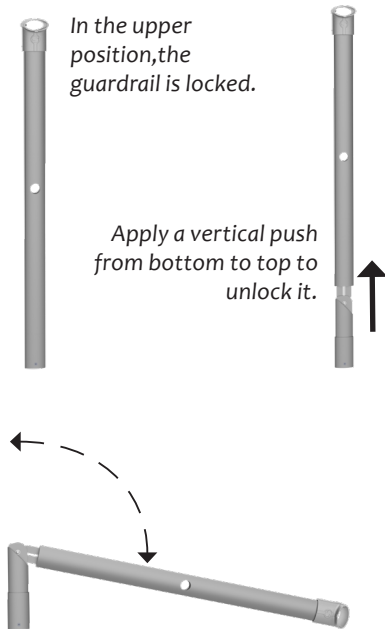

The foldable option is obtained by adding a joint to each upright of the **SECURILISSE®**.

Junctions

This guardrail is delivered in 3m sections (2 uprights) which are joined together by the handrails with a pin.

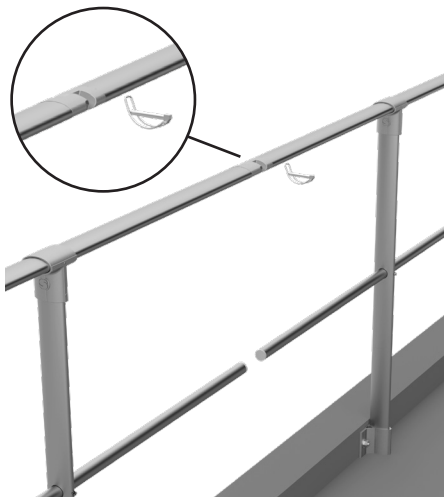

Customisation

This option is available for most of the **SECURILISSE®** fixation sockets.

In the upper position, the guardrail is locked.

Apply a vertical push from bottom to top to unlock it.

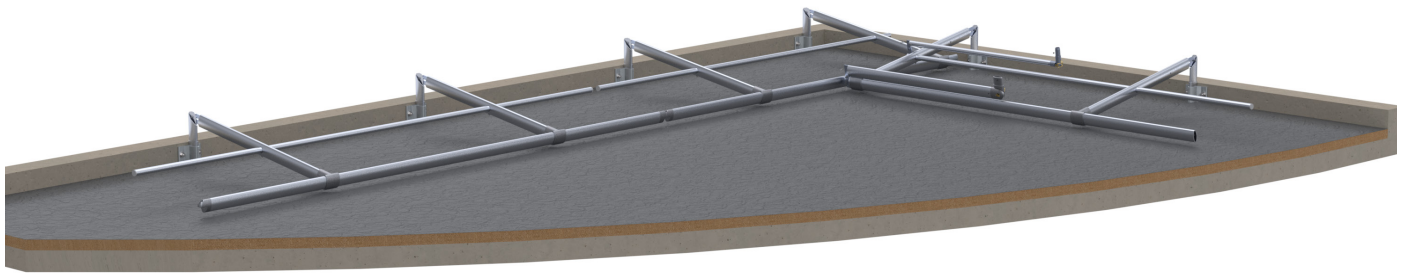

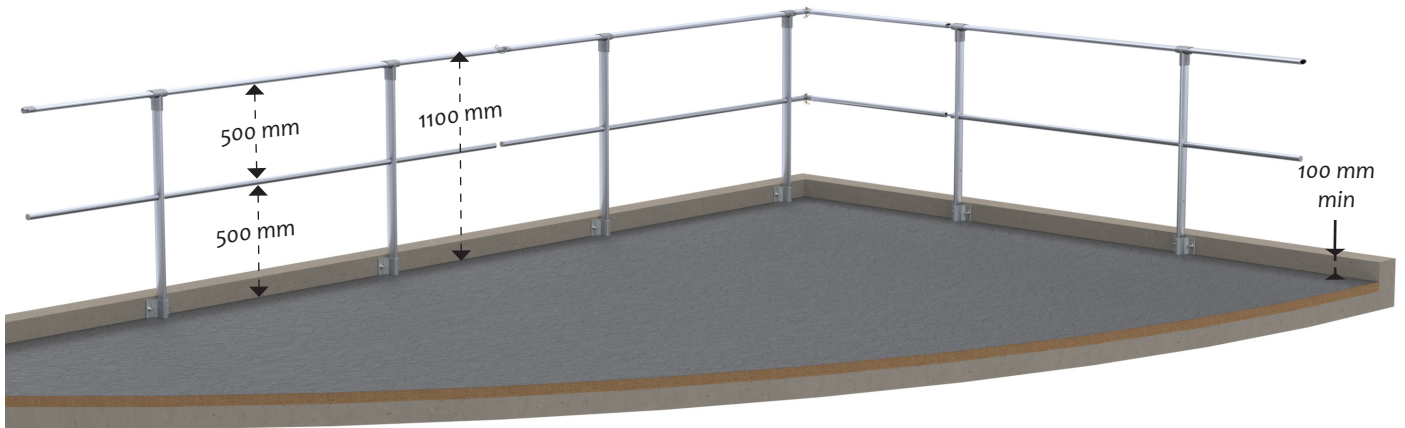

Then tilt the upright to the lower position.

Do the operations backward to put the **SECURILISSE®** in operational position.

Angles for the **SECURILISSE® rabattable**

The layout of the angles for **SECURILISSE®** equipped with the foldable option is very specific.

Fold down the guardrail section towards the inside of the device.
Do the reverse operation to put the **SECURILISSE®** in operational position.

See also GC-PL-R

The **SECURILISSE® GC-PL-R** is a free-standing, foldable guardrail. Supplied in 4.5 metre sections
